REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claim 8 is patentable over the prior art of record because of the specific structure of the laser beam scanner, which comprises a plurality of light sources, each light source emitting a laser beam of the plurality of laser beams, a first converging unit converging the emitted plurality of laser beams in a sub-scanning direction, a deflector that deflects the plurality of laser beams in a scanning direction, a second converging unit that converges the plurality of laser beams in the scanning direction and the sub-scanning direction, a photosensitive member onto which the plurality of laser beams are converged by the second converging unit, a detector that receives the deflected plurality of laser beams converged at least in the scanning direction by the second converging unit, and a third converging unit that converges the plurality of laser beams at least in the sub-scanning direction, wherein a width of the converged plurality of laser beams in the sub-scanning direction on the detector is less than a width of the plurality of laser beams in the sub-scanning direction on the photosensitive member. The combined limitations as currently claimed are taught or suggested by the prior art of record considered alone or in combination.

Claims 9-14 are allowed because they are directly or indirectly dependent from claim 8 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
